

Dear Colleague,

Thank you for referring your patient to Green Island Veterinary Clinic for one of our referral procedures.

To assist us in providing the best possible care, we would appreciate receiving any relevant clinical history, diagnostic results, imaging, laboratory findings, and current medication information **prior to us accepting the referral and scheduling the appointment.**

For Dunedin-based referrals, Green Island Veterinary Clinic will be responsible for the management of any **concerns directly related to the referral procedure for 72 hours following discharge**, including access to after-hours emergency care where required through the Dunedin Emergency Veterinary Clinic. This applies only to complications or concerns associated with the referral procedure and does not extend to unrelated medical conditions or emergencies.

Following any post-operative recheck or discharge appointment, a summary of findings and clinical notes will be forwarded to the referring clinic.

For patients from outside Dunedin, ongoing post-operative care will generally be coordinated through the referring clinic. However, we are happy to provide advice and assistance where possible should there be concerns regarding a post-operative complication related to the referral procedure.

Please do not hesitate to contact us if you would like to discuss the case further prior to referral.

Kind regards,

Green Island Veterinary Clinic, Dunedin
